

RICH PAULOO

I have coded workflows that stream real-time data from remote sensor networks⁷, built dashboards to bring clarity to massive datasets², developed physical simulation models of groundwater flow and contaminant transport³, made visualizations to improve machine learning interpretability⁴, and built R packages⁵.

Completing a highly quantitative, computational PhD has taught me to how to stay organized, rapidly learn new material, use skepticism to identify opportunities for improvement, ask creative questions, effectively collaborate, and communicate to diverse audiences.

I am currently searching for positions where I can work on technical, challenging, data-intensive problems for the betterment of society.
